How to Use Manual Exposure When You Record a Movie on Your ...

I emailed Canon regarding lack of exposure compensation in manual mode on the 5D3. They sent me the reply below. Hoping for a firmware update to correct this issue. If anyone else has an issue with this, please consider letting Canon know your position. I find this seriously limits the camera'...

5D3: No exposure compensation in manual mode. - Canon ...

I only ever used manual cameras with film, (back in the distant past!). These days, if I was using manual mode and felt that the cameras “opinion” needed correction it wouldn’t even occur to me to look for an Exposure Compensation control, I would simply change aperture or shutter speed directly - or, if I remembered, ISO - and what a luxury that is!

What is Exposure Compensation and How to Use It

Well, if adjusting exposure compensation in manual mode is pointless as both the aperture and shutter speed are fixed, how come many cameras allow you to enable AEB while in manual mode? I know on my 7D it ends up adjusting the shutter speed just as it would in Av mode, which is not particularly intuitive. - alex.forencich Jan 20 '14 at 3:07

Adjust exposure compensation in manual mode? - Photography ...

The exposure compensation range is $\hat{A}\pm 5$ stops in viewfinder shooting and $\hat{A}\pm 3$ stops in Live View shooting. As shown in the viewfinder and on the LCD panel, the exposure compensation range is $\hat{A}\pm 3$ stops. To set exposure compensation beyond $\hat{A}\pm 3$ stops, use the Quick Control screen or follow the instructions for [: Expo.comp./AEB].

Adjusting Photo Brightness/Setting Exposure Compensation ...

Working with the exposure compensation feature inside Canon Rebel cameras is super simple. Once you do it a few times and get the hang of it, you’ll wonder how you ever managed any photography without it. In today’s post, I’ll demonstrate the manual steps necessary to adjust exposure compensation in the Canon Rebel T6i.

How to Manage Exposure Compensation with a Canon Rebel T6i ...

Check the exposure level indicator and set the desired shutter speed and aperture value. Exposure Compensation with ISO Auto. If the ISO speed is set to [AUTO] for manual exposure shooting, you can set exposure

compensation as follows: Tap the exposure level indicator [: Expo.comp./AEB] Quick Control screen

Canon : Product Manual : EOS R5 : M: Manual Exposure

However, in Manual exposure mode, both the aperture and the shutter speed are determined by the user and reflected in the image—the camera does not automatically set any of the exposure settings. In this sense, Manual exposure mode settings will not be affected by the overall brightness of the shooting conditions—unless, of course, you adjust them yourself.
