The introduction of Nikon's new D700 may have been one of the worst kept secrets in an industry with more leaks than the Titanic, but it was still something of a surprise coming so hot on the heels of the D3 and D300. Essentially a D3 shrunk down and squeezed into a body roughly the same size as a D300, the D700 is Nikon's first 'compact' professional SLR, and in its segment of the market will ...

This is my fourth Nikon (although the first was a film camera) and undoubtedly the best. A little lighter in weight than the D200 I have used until now and much more user-friendly and versatile with lots more pixels (which I needed to produce 15"x10" prints without pixellation). Got it at a great price because it wasn't the latest model.

Nikon's highest resolution DSLR to date, the D800/E more than doubles the pixel count of the flagship D4. The D800 is potentially very attractive to studio and landscape professionals, but should pique the interest of a great many enthusiast Nikon users too - many of whom may have been 'stuck' at 12MP for years, with a D300, D300s or D700.
