While I try to make sure to credit any reference source throughout the document, a complete list of references can be found at the bottom.

## **High Yield Pathology for Residents & Fellows**

Of these layers, the most high-yield to focus on is the mucosa. It varies according to where you are (esophagus vs. stomach vs. small intestine vs. colon), and it's easy to forget after you've been away from it for a while. If you remember the main function of each area, it will help you remember what cells are present in the epithelium.

Really good book for a “Review” of pathology ( a lot of detail). I used this Goljan Rapid Review in my basic sciences and now I will be definitely using it again to study for my step 1. It contains high yield photographs and margin notes which are a quick review of you need to know note. An excellent addition to my step 1 studying material.
